

WAHID ALI

Laravel Backend Developer | PHP | RESTful APIs | MySQL

+971 50 964 8931 | wahidali.dev@gmail.com | wahidali.me | linkedin.com/in/wahid-ali/

Currently based in Dubai, UAE | Available immediately

PROFESSIONAL SUMMARY

Laravel Backend Developer with 3+ years of hands-on experience in PHP, Laravel framework, RESTful API development, and MySQL database optimization. Proven expertise in designing scalable backend architectures, implementing secure authentication (Laravel Sanctum / Passport), optimizing Eloquent ORM queries, and managing CI/CD pipelines. Strong background in building and maintaining production-grade web applications including HRMS, food delivery platforms, CRM systems, and healthcare portals. Currently based in Dubai, UAE with immediate availability.

CORE TECHNICAL SKILLS

Backend:	PHP · Laravel · CodeIgniter 4 · Eloquent ORM · Laravel Sanctum · Laravel Passport · Laravel Queues · Artisan · Blade Templating · MVC Architecture
APIs:	RESTful API Development · API Authentication · Mobile API Integration · Third-party API Integration · Stripe · PayPal · SOAP/REST
Database:	MySQL · SQLite · Database Schema Design · Query Optimization · Indexing · Eager Loading · N+1 Query Resolution · Migrations
Frontend:	Vue.js · Alpine.js · Tailwind CSS · Bootstrap · HTML5 · CSS3 · JavaScript
DevOps/Tools:	Git · GitHub · Bitbucket · CI/CD Pipelines · Linux · Ubuntu · Nginx · Docker (basic)

WORK EXPERIENCE

Laravel Developer | [AlrightTech \(SMC-Pvt\) Ltd](#) | Islamabad, Pakistan *May 2023 – Nov 2025*

- Developed and maintained a full-scale Laravel HRMS supporting 200+ employees, covering modules for attendance, payroll, loan management, timesheets, and shift scheduling.
- Built 20+ RESTful APIs for mobile app integration with secure Laravel Sanctum authentication and real-time data synchronization.
- Designed and optimized MySQL database schemas; resolved N+1 query issues using Eloquent eager loading, reducing database calls by 80–90% in key dashboard views.
- Optimized slow MySQL queries using indexing strategies and query refactoring, improving average response time by ~25%.
- Architected backend for a food delivery platform (delmunch.com) including order management, restaurant panel, and customer-facing APIs.
- Integrated Stripe and PayPal payment gateways for a healthcare platform (bticc.org) supporting appointment booking and telehealth services.
- Managed CI/CD deployment pipelines via Bitbucket; administered Ubuntu/Linux servers with Nginx configuration for production environments.
- Collaborated closely with frontend (Vue.js / Alpine.js) and mobile teams to deliver smooth API integrations and reduce cross-team blockers.

PHP Developer | [S2S Developer And Marketing Pvt Ltd](#) | Islamabad, Pakistan *May 2022 – Apr 2023*

- Built and maintained a custom CRM system in Laravel/PHP, processing 3,000+ leads per month with automated multi-team assignment logic, cutting manual effort by ~40%.

- Designed and optimized MySQL database structures, improving query execution speed by 30–45% through schema normalization, indexing, and caching strategies.
- Refactored legacy codebase: removed duplicate logic, consolidated redundant queries, and restructured Eloquent models for better performance and maintainability.
- Implemented employee performance monitoring and lead workflow reporting modules with accurate data tracking.

Laravel Developer (Internship) | Conzummate Tech Ltd | Lahore, Pakistan*Dec 2021 – Mar 2022*

- Contributed to 8+ RESTful API endpoints on live Laravel web applications, applying MVC architecture and Laravel best practices.
- Performed debugging, bug fixes, and code optimizations; collaborated in Agile team workflows to support onboarding and reduce integration issues.

KEY PROJECTS

HRMS System — AlrightTech (SMC-Pvt) Ltd | iaoi.io/iaoi-hrms

- Laravel/MySQL HRMS with 6 modules (employee records, payroll, attendance, loans, timesheets, shift management) for 200+ users.
- Eliminated N+1 Eloquent ORM issues via eager loading, cutting DB calls by 80–90%; enhanced UI responsiveness with Alpine.js.

Food Delivery Platform — AlrightTech (SMC-Pvt) Ltd | delmunch.com

- Developed admin/restaurant panel and 20+ RESTful APIs (order processing, real-time tracking, menu management) for a multi-restaurant food delivery app.

Healthcare Platform (BTLCC) — AlrightTech (SMC-Pvt) Ltd | btlcc.org

- Built RESTful APIs for online/same-day appointment booking, patient registration, and telehealth scheduling; integrated Stripe and PayPal payment gateways.

CRM System — S2S Developer And Marketing Pvt Ltd | s2smark.com

- Custom Laravel CRM with automated lead import, multi-team assignment, and performance reporting — processing 3,000+ leads/month, reducing manual work by 40%.

EDUCATION

Bachelor of Science – Software Engineering | University of Swat | Pakistan*Sep 2017 – Oct 2021*

- Relevant coursework: Software Architecture, SDLC, Database Systems, Object-Oriented Programming, Algorithms & Data Structures.

ADDITIONAL INFORMATION

Languages:	English (Professional), Urdu (Native), Pashtu (Native)
Certifications:	Web Development – PHP, MAX TECH Computer Institute
Location:	Deira, Dubai, UAE — Available for immediate joining, open to relocation within UAE
